DREER'S SUPERB ASTERS

We take special pains to secure only the choicest Asters, and nothing better in quality can be had at any price; beware of low-priced stock, it is liable to be low grade at the same time.

For early flowering, Queen of the Market is used almost exclusively, although the earliest of all is Early Wonder. White Fleece and Lavender Gem are also early and very desirable. Our Superb Late Branching is in most demand for late, while for mid-season Crego's Giant, Pink Beauty, Ostrich Feather, Paeony Perfection, are all equally desirable.

AMERICAN GROWN ASTERS

The varieties offered on this page are all American grown and stand at the head of Asters for the American climate.

The stocks have all been grown under our own supervision, and we know that the quality in every case is as fine as can be had at any price and much superior to what can be procured from most sources.

CREGO'S GIANT COMET ASTER

Dreer's New Aster "Peerless Pink"

This grand new Aster may briefly be described as a glorified late branching shell-pink or Mary Semple. It has the same strong, sturdy habit of growth; comes into bloom a little earlier, bears freely almost globular flowers rarely under 4 inches across and frequently over 5 inches. The color is rich shell-pink, similar in shade but more decided than the late branching. The centre petals are prettily incurved while the wide outer petals reflex making a most artistic and finely finished flower. 50 cts. per trade packet; \$4.00 per oz.

Dreer's New Aster "Pink Beauty."

A magnificent cut-flower variety, in bloom from early August until well on in September; 24 to 30 inches high; flowers average 4 inches across, on long, strong stems. Color a delicate blush pink, and pronounced by experts to be the finest pink midseason sort yet introduced. 50 cts. per trade packet; \$4.00 per oz.

Dreer's New Late Aster "Crimson King."

A superb new late-branching variety, with perfectly double flowers of rich, rosy crimson, full of fire. Fine for cutting, showing up well under artificial light. 40 cts. per trade packet; \$2.50 per oz.

Crego's Giant Comet Asters.

Magnificent fluffy flowers, averaging over 5 inches across, with long strong stems; the finest of this type. Comes into bloom in August, continuing well into September, and, unlike most of the Comet sorts, stands when cut and is a good flower to ship. We offer two colors, our own saving, of the highest quality.

	Tr. pkt.	Oz.
Shell-pink	40	\$2 00
Snow-white	40	2 00

Early Wonder Asters

This is the earliest Aster in cultivation, being in full bloom when Queen of the Market is only in bud, frequently coming into bloom in late June. Flowers larger than Queen of the Market, borne on long, strong stems. Very valuable for cutting.

	Tr. pkt.	Oz.
Early Wonder White. Pure glistening white	40	\$2 00
Early Wonder Pink. A good, clear pink	40	2 00

DREER'S SUPERB LATE BRANCHING ASTER

Dreer's Superb Late Branching

The finest Aster for late August and September blooming. The plants form strong, branching bushes, 2 to 2½ feet high, bearing on long, strong stems their handsome Chrysanthemum-like flowers, which, under ordinary cultivation average 5 inches across. The form of the flowers, together with the length of the stems, places them at the head of Asters for cutting. They come into bloom from two to three weeks after the average type, usually being at their best during September, and filling in the gap between the general run of Asters and Chrysanthemums. We offer eight beautiful and distinct colors, viz.

Purity. Identical in every way to Daybreak, but of pure glistening white	50	2 50
Lavender Gem. One of the most beautiful Asters. Of Comet type, with large, artistic, loosely-arranged flowers of the most charming shade of lavender imaginable	50	3 00
Violet King. A new and distinct color in the Late Branching class, fine large double flowers of a pleasing shade of violet, a strong, free grower and very free flowering	30	1 50
White Fleece. Large and most perfect flowers 5 inches and over across, formed into a plummy globe of glistening white. Blooms in August	50	3 00

For full descriptions and illustrations, see our Garden Book for 1911.

DREER'S DOUBLE FRINGED PETUNIA

Petunia.

Our Riverton grown strain of Double and Single Fringed Petunia have long been celebrated as the best on the market. We keep continually culling out and hybridizing and thus maintain the high standard. We frequently test stocks from the world's best growers and can say, without fear of contradiction, that our own strain is by far the best to be had at any price.

Note.—We would especially call the attention of every florist who grows Double Petunias from seed that all the smallest and weakest seedlings should be saved, as they usually produce the finest double flowers. The same is true of the singles, the strong seedlings being inclined to "weediness."

Dreer's Superb Double Fringed. Our own unrivaled strain. Every seed saved at Riverton. 75 cts. per 500 seeds; \$1.50 per 1000 seeds.

Double Fringed Imported. Seeds are saved by one of the foremost European growers; the best that can be had abroad. \$1.00 per 1000 seeds.

His Majesty. Ground color silvery-grey with dark green veins, which are bordered with rosy-purple; edge of the leaf bordered green.

Kaetchen Schadendorf. Foliage not large but of great beauty, the ground color being silvery-white, suffused and illuminated with bright rosy-crimson sheen, with a large blackish-green centre and border of same color.

Mrs. S. H. Moon. Centre of leaf and a broad margin of black-green suffused with purple, with a large, distinct zone of old silver which is delicately dashed with rose.

Tuberous-Rooted Begonias.

Through careful selection, every season sees an advance in the quality of these beautiful Begonias. Our stock is grown for us by one of the most eminent specialists in Belgium, whose strain is celebrated for its size, rich coloring, form and substance.

The price is as low as is consistent with good quality; the retail florist who is growing a few hundred bulbs for his spring trade, will find many of the cheap strains offered dear at any price. We offer but one quality, and that is the best.

New Lorraine Begonia.

Glory of Cincinnati

A variety which is likely to supersede *Gloire de Lorraine*. It is a strong, robust grower, with flowers much larger than any of this type, in color a most beautiful shade of soft satiny pink. It is easy to propagate and easy to grow, and can be grown into a beautiful, finished specimen even in a four-inch pot. It blooms from October to April, but the most important point in its favor is the fact that it retains its flowers and will outlast all the other varieties, making it the ideal sort for the retailer to handle.

Good thrifty young plants from 2 1/4-inch pots. June delivery. \$25.00 per 100; \$200.00 per 1000.

NEW MARGUERITE, MRS. F. SANDER

Cassia Floribunda, A. Boehm.

A free-flowering plant, with large orange-yellow flowers, which are produced throughout the summer and fall. An elegant subject for planting in the border in summer, or for pot culture, or it may be grown in a tub into a large specimen, five feet or more high, in which shape it makes an effective lawn plant. It can be wintered in a dormant condition in a cellar or similar place, where not exposed to severe frost. 25 cts. each.

NEW MARGUERITE, MRS. F. SANDER

In this we have unquestionably the most important flowering plant introduced in recent years, which, like its predecessors, the French Marguerite and the later introductions, white and blush Queen Alexandra, will be grown extensively for cut flowers during the winter, while its pure white color will make it more valuable than any as a pot plant for Easter decorations.

Unlike all other Marguerites, its color is of the purest glistening white throughout; in size it frequently measures 5 inches across; the centre of the flower is a mass of closely arranged fringed florets; these are surrounded or edged by the broad, shining white ray petals, forming a flower which reminds one forcibly of a glorified double Pyrethrum. These are produced on long stems with a freedom not known in other varieties of the Marguerite. Strong young plants, ready April, \$2.00 per doz.; \$15.00 per 100.

Chrysanthemum Frutescens.

Paris Daisies or Marguerites.

Queen Alexandra. This variety has pure white flowers from 2½ to 3 inches in diameter, the greater percentage coming full double.

The remainder of the flowers on the same plant come semi-double and single, all of which are very handsome.

Blush Queen Alexandra. A splendid blush pink form of the above.

California Giant. The best large single white.

Etoile d'or. A large, soft, pure yellow.

60 cts. per doz.; \$4.00 per 100.

Choice Single Flowering Chrysanthemums.

These are attracting much attention and are becoming popular as pot plants, as well as for cutting in sprays; very easily grown.

Nerthus. Flowers fully 6 inches in diameter, of splendid form, borne on stout, stiff stems, held well above the foliage. The centre of the flower is a rich, glowing bronzy orange-yellow, passing to a carmine-rose at the tips, the whole suffused with a glowing golden color, which gives it an iridescence which it is not possible to describe. Strong plants, ready April 15th. 35 cts. each; \$3.50 per doz.; \$25.00 per 100.

Rheinkönig. In this we believe we are offering the ideal white Cactus Dahlia which has been a desiderata for a long time. In habit of growth it is robust, similar to the varieties Lawine and Flora; in color a pure snow-white, with flowers 5 to 6 inches in diameter. These are of great substance, lasting splendidly when cut; they are borne on long, stiff stems held well above the foliage, making it as valuable for garden decoration as for cutting. Our own representative had the opportunity of comparing this variety with many other sorts which were planted for comparison at the trials which during the past summer were made at the Palmen Garten at Frankfurt, Germany, where it showed up in such superior form over all others that we at once secured all available stock. We offer it, believing it to be the most desirable acquisition in Dahlias offered in many years. Strong plants, ready April 15th. 50 cts. each; \$5.00 per doz.; \$35.00 per 100.

Vater Rhein. Flowers frequently 7 inches in diameter, raised well above the foliage on stout stems; the petals are broad, curled and twisted, forming an ideal flower, the color of which is yellow suffused with salmon-rose; a beautiful, attractive and imposing flower. Wodan. This is the strongest-growing variety in the collection, the plant being exceptionally robust and growing fully 6 feet high, with large, bold flowers, frequently over 7 inches in diameter; but with this large size there is no coarseness, the flowers being a graceful arrangement of semi-incurved tubular petals of a most pleasing, delicate salmon-rose color shading to old gold in the centre. Strong plants, ready April 15th. 35 cts. each; \$3.50 per doz.; \$25.00 per 100.

NEPHROLEPIS SCHOLZEI

FINE FERNS—Varieties of Special Merit

Nephrolepis Scholzei.

(The Crested Scottii.)

This variety has met with great favor and has made a permanent place for itself. It is the ideal crested Fern, holding the same position to all other crested varieties that Scottii holds to the old Boston. It is a sport from Scottii, possessing all the merits of that most popular variety, but with the pinnae sub-divided, giving it a neat crested appearance. The fronds, like in Scottii, stand erect, with a graceful arch forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance as is so often the case with all other crested forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air, prevents the centre of even the largest specimen from becoming defective or yellow, which is one of the weak points of all of its predecessors.

Nephrolepis Superbissima.

(Introduction of 1908.)

Entirely distinct from all other crested forms, the fronds being heavily imbricated with the pinnae overlapping, making them very dense and compact. In color it is of a rich, dark green, of sturdy habit; the fronds being firm and rigid, never break down. 2½-inch pots, \$2.00 per dozen; \$12.00 per 100. 4 inch pots, \$3.50 per dozen; \$25.00 per 100.

Nephrolepis Elegantissima Compacta.

A dwarf, compact form of N. Elegantissima, forming a dense, bushy, compact plant of ideal shape; a valuable addition to this class. Strong plants from 2½-inch pots, \$2.00 per dozen; \$15.00 per 100.

Nephrolepis Glatrasii.

This variety introduced last fall in a very limited way, has proven to be a gem, especially where a perfect specimen is required in a small size. It will develop beautifully in a three, four or five-inch pot, making an ideal plant for many purposes where the other varieties of Nephrolepis are too coarse; grown in a 2½-inch pot it will prove valuable for Fern-dish work. While it is a direct sport from the Boston Fern, to call it a miniature form of Scottii will convey a better idea of its appearance. 2½-inch pots, \$2.00 per doz.; \$12.00 per 100; \$100.00 per 1000. 5 inch pots, 50 cents each.

Nephrolepis Exaltata Superba.

Another magnificent crested or plumed variety of the Boston Fern, probably the most beautiful of all. Its pinnules which overlap each other are densely frilled, divided and sub-divided into plumose crests. The plant attains a height of over three feet, but to do it well it must be kept continuously in a growing condition. Good plants \$1.50 each.

Adiantum Croweanum.

We are the sole distributors of Mr. Crowe's stock of this valuable fern.

This is not only the best and most profitable Maiden-hair to grow for cutting, but it is also the best variety to recommend to the retail buyers for house culture, it standing the dry atmosphere of the room better than any variety we have yet tried.

Strong, 3-inch pots, \$2.00 per dozen; \$15.00 per 100; \$140.00 per 1000.

Polypodium Glaucum Cristatum.

This splendid Polypodium is a perfect gem and entirely distinct from all other Ferns and an excellent subject to grow into specimen plants, like Polypodium Glaucum the fronds which attain a height of about two feet are of a metallic glaucous blue color, but with the edges of the pinnae wavy and crispate, giving the whole plant a unique and graceful appearance. (See cut on page 32) 75 cts. each.

Pteris Childsi.

This beautiful variety is to Pteris what Farleyense is to Adiantums, and like that variety produces no spore, so that propagation is by the rather slow method of division, which will keep it a rare variety. The plant is of strong growth, attaining a height of about 20 inches; fronds large, pinnae deeply dentated and undulated, tips crested. Makes a beautiful specimen for exhibition. We offer a limited lot in 4-inch pots, 75 cents each.

Pennisetum Cupreum.

The Pennisetums during the past few years have become such popular bedding plants, especially for the bordering of large beds of Cannas, Caladiums, as well as for planting in connection with the various Hardy Grasses, that a new variety is certain to meet with a welcome.

Pennisetum Cupreum is a cross between the fine leaved *P. Rueppelianum* and the red leaved *P. Macrophyllum Atrosanguineum* introduced by us some eight years ago.

This new variety originated with Prof. Cowell at the Botanical Gardens, Buffalo, N. Y., and combines the good points of both of its parents. The foliage is somewhat wider than the narrow leaved *P. Rueppelianum*, and it has the dark coppery bronze color of *P. Macrophyllum Atrosanguineum*, the plumes are of a tawny crimson color. It grows 3 to 3½ feet high. A distinct and valuable addition to our list of tender grasses.

Young plants ready April 15th. 15 cts. each; \$1.50 per dozen; \$10.00 per 100.

New Everblooming Pelargonium, "Easter Greeting."

This variety is remarkable for its early and free-flowering habit, and while its principal crop of flowers is produced in early spring, it is the first variety introduced which, in a favorable season, continues to bloom throughout the summer and fall months. Its flowers are of large size, of a bright amaranth-red, each petal marked with a large black blotch. 25 cts. each; \$2.50 per doz.

KENTIA BELMOREANA

DREER'S SELECT ROSES

The Roses which we here offer are, with few exceptions, field grown stock either American grown or plants that have been imported from England and Ireland.

These plants are all potted up during December and January, stored in cold houses, so that they break away naturally in spring, making this the best possible stock for selling to the retail customer.

The prices noted are for strong plants in 5 and 6-inch pots (according to the growth of the variety) for delivery during April and May, and while we will make shipments earlier if requested, we prefer to book orders for these months only.

Two New Forcing Roses**Double Pink Killarney**

This new variety originated with Messrs. Robert Scott & Son, of Philadelphia, as a sport from a white flowering Killarney which originated with them some four years since which, however, on account of being less double than the Waban strain of White Killarney was never put on the market, however a stock of some seventeen hundred plants was grown for cut flowers, and one of these plants sported back to pink, however, not the same form as Killarney, it is several shades lighter in color but of much stronger growth and more double flowers, these containing from 10 to 12 more petals, and of larger size than Killarney.

Yellow Forcing Rose "Melody."

Melody is the freest flowering winter forcing Rose yet introduced, and is a pedigree seedling raised by Alex. Dickson & Sons, to whom we are indebted for Killarney, Liberty, Mrs. Jardine, and many other fine varieties. Unlike other forcing varieties, the growth of Melody is strong and willowy with rich glossy foliage. The flowers are of perfect form, of a beautiful yellow shading to a deep apricot yellow towards the centre. Messrs. Robert Scott & Son, of Philadelphia, have had this variety on trial during the past season, and say of it: "This splendid yellow Rose" will be particularly valuable to the Florist from the fact that it produces such quantities of bloom in winter, when other varieties are apt to be shy. With us it is as free in winter as My Maryland is in summer. From one two-year old plant during December 25 flowers were cut and from the same plant, on the next crop 27 flowers. Melody is offered only in own root plants as it succeeds better in that shape.

HARDY PERENNIAL PLANTS.

For some years past we have been handling Hardy Perennials as one of our leading specialties, and our stock at the present time is unquestionably the most complete both in variety and quantity in the country.

Many planters not thoroughly familiar with this class of plants have an idea that nothing but a large, field-grown clump will give satisfactory returns the first season. This, as experience has taught us, is in most instances, a mistake. A vigorous plant of proper size will, in nearly every case, give quicker and better returns than the best so-called "field clumps" that can be procured. It will be noticed that the majority of the stock offered in this list is described as being 3, 4 or 5-inch pots. This does not necessarily mean that the plants have been altogether pot-grown, but that they have been field-grown and dug and potted up during the Fall and early Winter months, and such stock can be planted, even late in the Spring, with practically no loss, which, in the case of clumps, is often quite serious.

We are the largest growers of Perennial Phlox in the world, having this season over a half million field-grown plants in stock.

The collection offered below embraces every known color in this gorgeous race of Summer flowering plants, and we are prepared to furnish many of the rarer as well as the older standard varieties in large quantities at a low uniform price.

The plants we offer are all strong one-year-old field-grown, and will make a fine display of flowers this season.

THALICTRUM

Tritoma.

(Red Hot Poker, Flame Flower, or Torch Lily.)

The introduction of early, free and continuous-blooming varieties has made this one of the great bedding plants, and when we consider that, outside of Cannas and Geraniums, there are few plants which are suitable for massing under our climatic conditions, it is little wonder that such excellent subjects should at once become popular.

Obelisque. Large spikes of saffron yellow, with brighter shadings; July and August; $3\frac{1}{2}$ to 4 feet. \$1.50 per dozen; \$10.00 per 100.

Pfitzerii. (*The Everblooming Flame Flower.*) The freest-flowering variety; in bloom from August to November, with heads of bloom over 12 inches long, of a rich orange scarlet, producing a grand effect either planted singly in the border or in masses. \$1.00 per dozen; \$6.00 per 100; \$50.00 per 1000.

Quartiniana. This novel variety flowers during the latter part of May and June in spikes 10 to 12 inches long, orange red when first opening, the lower part changing to yellow when mature; $3\frac{1}{2}$ to 4 feet. 35 cents each; \$3.50 per dozen.

Tricolor. The buds are first cochineal-red, changing to canary yellow as they develop, finally opening a sulphur white; very free-flowering; August to October; $2\frac{1}{2}$ feet. 15 cents each; \$1.50 per dozen; \$10.00 per 100.

Uvaria Grandiflora. The old-fashioned late flowering sort; spikes 3 to 5 feet high, flowers rich ochre red, passing to salmon pink. \$1.00 per dozen; \$6.00 per 100; \$50.00 per 1000.
